

Mobile Conditioning Units

In order to use test stands to full capacity, the flexibility in conditioning of operating fluids is a major criterion. Because of its mobility and highly adaptable capabilities, the mobile conditioning unit is suitable for many applications.

- **Ready for a wide variety of applications**
 - Variable flow rate
 - Variable operating pressure
 - Variable operating temperature
 - Optical indicators
 - Digital indicators
 - Test ports
- **Mobile for usage in different places**
 - System on a mobile frame
 - Narrow design to fit through doors
 - Hoses and lines attached to the frame
 - Integrated storage tank

Our conditioning units are custom-build.
